# TRFA 2026 ANNUAL MEETING

Monday, October 26 – Wednesday, October 28, 2026

## Join Us in Cleveland!

On behalf of the TRFA Board of Directors, Committee Chairs and the 2026 Annual Meeting Planning Committee, we are delighted to invite you to the Thermoset Resin Formulators Association (TRFA) 2026 Annual Meeting. This meeting is dedicated to bringing you the latest information and research in our industry.

**Vinay Mishra**  
**President,**  
**Thermoset Resin**  
**Formulators**  
**Association**

We hope that you enjoy the 15+ groundbreaking technical papers, outstanding research from the Excellence in Thermoset Polymer Research Award recipients, and an excellent short course on **Formulation, Curing, and Characterization** from Jeff Gotro, PhD, InnoCentrix. You will also be able to meet and network with numerous suppliers and distributors - all providing the leading technology and equipment in the industry. Lastly, we leave some time for fun - a tour of the **Rock and Roll Hall of Fame**, and two receptions to network and catch up with friends.

Please feel free to reach out with any questions. We look forward to welcoming you to Cleveland!

HALL OF FAME**

## Short Course

### ► Short Course: Formulation, Curing, and Characterization

Presented By: Jeff Gotro, PhD, InnoCentrix

Monday, October 26, 2026 | 8:00AM - 12:00PM *(Additional fee required to attend)*

#### Overview

##### Formulation

1. Formulation Basics
  - Components
  - Stoichiometry considerations
  - Example formulations
2. Formulation Strategies
  - How to build a formulation
  - Base resins, selection, optimization
  - How to incorporate additives (adhesion promoters, flame retardants, tougheners, diluents, etc.)
  - Fillers
    - a. Filler types, role of fillers
    - b. Particle packing concepts
3. Design for Manufacturing (mixing, dispersion, packaging)
4. Product Architecture Concept
  - How to build a product architecture (or sometimes call a product platform)
  - Advantages of having product architectures
    - » Customization for specific customers
    - » Product line extensions

##### Curing

- Introduction to thermoset cure chemistry
- Key concepts of gelation and vitrification during curing
- Important structure-property-process relationships

##### Characterization

###### Thermal Analysis Methods for Thermoset formulations:

- Differential Scanning Calorimetry (DSC)
- Thermal Mechanical Analysis (TMA)
- Thermogravimetric Analysis (TGA)
- Dynamic Mechanical Analysis (DMA)

###### Rheological testing:

- Rheological testing of uncured, formulated thermosets (critical to understand dispensing of adhesives, coatings, laminates, composites)
- Overview of rheological testing
  - » controlled stress, controlled strain, testing geometries
- Rheology during curing and processing (chemorheology)

#### About the Faculty

##### Jeff Gotro, PhD

Jeff has over thirty-eight years' experience in thermosetting polymers used in electronics having held scientific and leadership positions at IBM, AlliedSignal, Honeywell International, and Ablestik Laboratories. During his corporate life, Jeff developed a deep understanding of polymer science and became a nationally recognized authority in thermosetting polymers. He has received invitations to speak at prestigious Gordon Research Conferences (Thermosetting Polymers and Composites) and has presented numerous invited lectures, along with technical presentations and short courses at national technical conferences. Jeff was an Adjunct Professor at Syracuse University in the Dept. of Chemical Engineering and Materials Science from 1986-1993. Jeff has published 60 technical papers (including 4 book chapters, one with Dr. Prime) in the field of polymeric materials for advanced electronic packaging applications and holds 15 issued US patents, and have 6 patents pending. Jeff has a Ph.D. in Materials Science from Northwestern University with a specialty in polymer science.
